

ReedCleaner

The ReedCleaner from Groz-Beckert delivers a hydrodynamic cleaning alternative to the weaving industry

The practical supplement in weaving preparation

- Mobile system for cleaning of all reeds
- Cleaning is effected in the weaving machine

Primary features

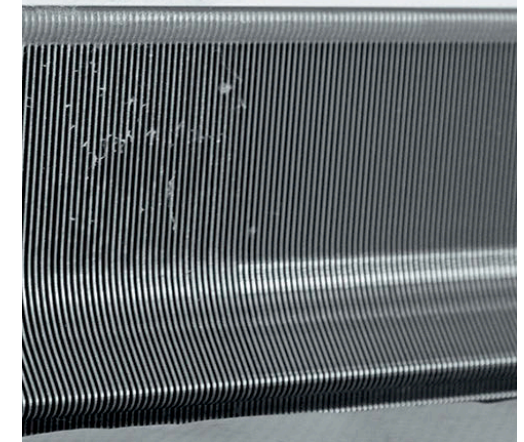

- Suitable for flat reeds and channel reeds
- Efficient cleaning system - a combination of steam and cleanser with application by a specially-designed cleaning head
- Flexible application: complete cleaning of the reed in the machine
- Simple handling: for fast and easy cleaning
